## Responsible Use of Computing Resources

## General Principles and Guidelines

Issued by: Technology Steering Committee

Applies to: All Members of the New Jersey City University 6mmunity

Effective date: July 29, 2000

The following ispermitted expected when using University computing resources:

- x use resources only for authorized purposes.
- x access only files and data that are your own, that are publicly available, or to which you have been given authorized access.
- x use only legal versions of copyrighted software in compliance with vendor license requirements.
- x comply with State and Federal laws and policies, and University policies and guidelines regarding standards of conduct on the use of the Internet.
- x for the campus systems that require it, protect **ydser** ID from unauthorized use. You are responsible for all activities on your User ID or system.
- x observe all applicable policies of external data networks when using such networks via the University computer facilities.

The following is not permitted when using University computing resources:

- x monopolize computing resources...
- x use another person's User ID, password, files system or data.
- x use computer programs to decode passwords or access control information.
- x attempt to circumvent or subvert system security measures.
- x attempt to modify or destroy University computing or communications equipment.
- x remove any University computing or communications equipment without proper authorization.
- engage in any activity that might be harmful to systems or to any information stored thereon, such as creating or propagating viruses, disrupting services, or damaging files.
- x use University systems for partisan political purposes, such as using electronic mail to circulate advertising for political candidates.

General Principles and Guidelines Page1 of 2
Prepared: June 14, 1999 Revised:August2011 (11)

- x download, copy or use material from the Internet in violation of copyright laws.
- x use mail or messaging services to harass, intimidate, or otherwise annoy another person, for example, by broadcasting unsolicited messages or wanted mail.
- v use social networking or sharing web resources to harass, intimidate, or otherwise annoy another person, for example, by posting slanderous comments about a member of the university on MySpace.
- v use the University's systems for personal of the university of the University of the University of the University.
- x use the University' systems for commercial purposes unrelated to academic and/or University related work.
- x make or use illegadopies of copyrighted software, video, or music, store such copies on University systems, or transmit them over University networks.
- x use the University's systems for any illegal activity.
- x engage in any other activity that does not comply with Generadiples presented above.

## **ENFORCEMENT**

The University considers any violation of appropriate use principles or guidelines to be serious offense and reserves the right to copy and examine any files or information resident on University systems allegedly related to inappropriate use. Violators are subject to disciplinary action including loss of all University computing privileges and possible criminal charges including civil damages. Offenders also may be prosecuted under various state & federal laws including (but not limited to) the Privacy Protection Act of 1974, The Computer Fraud and Abuse Act of 1986, The Computer Virus Eradication of 1989, Interstate Transportation of Stolen Property, and the Federal Electronic Communications Privacy Act. Access to the test of these laws is available through the Reference Department of the Library. Violators may also cause the University to be liable to civil or criminal penalties.

## **DEFINITIONS**

COPYRIGHT: Protection by US Office of Copyrights, Patents, and Trade Secrets probabilits copying of books, computer software, trade secrets, proprietary information, videotapes or videodiscs for distribution to others.

NON-COPY PROTECTED: Means that the computer software does not have a "software which prohibits making ANY opies of the original disks or allows NO MORE THAN ONE "BACK UP" of the original disks. A program which is identified as NOOPY PROTECTED is still copyrighted and therefore multiple copies can not be made.
